# SHAY GOLDIN

## EXPERIENCE

- Cloud & DevOps
- Backend & Programming
- GCP
- Kubernetes
- IAM Rols/Permissions
- CI/CD
- OAuth 2.0
- Docker
- GitHub
- Unit Testing
- Linux

## TECH STACK

- Java 17
- Spring Boot 3
- MySQL
- PostgreSQL
- ThymeLeaf

## SOFT SKILLS

- Strong analytical and troubleshooting mindset
- Effective communicator with a collaborative approach
- Quick learner, eager to adopt new technologies and methods
- Detail-oriented and process-driven
- Self-motivated and proactive in problem-solving
- Open to feedback and continuous improvement
- Resilient under pressure, with a calm and persistent attitude

### Backend support for a live deployed project

2025-present Freelance

Designed and implemented RESTful APIs in Java (Spring Boot) to support dynamic invoice generation and retrieval, integrating seamlessly with a PostgreSQL database.
Provided backend support for a modular front-end stack (HTML, CSS, JS), ensuring secure data flow, input validation, and responsive error handling across components.
Configured secure PostgreSQL access and resolved backend issues using JDBC, structured logging, and targeted testing.

### Full stack developer (medior level)

2024-present Informiz.org

Investigate and fix bugs both in the front and back-end of the software
Implement test and deploy code to Test/Prod environments on GKE
Configure roles and permissions for cloud services, following security best-practices
Developed PubSub systems for security and backup.
Troubleshoot deployment issues of K8S pods, e.g., access issues to image registries
Find solutions to DevOps issues in documentation and community forums
Use both web-UI and command-line tools to dig into logs

### Junior Java developer

2023 - 2024   Informiz.org

As a Java developer I maintain, test and enhance our spring-boot web application.
I work on features and bugs both in Back-end and Front-end.
Learned how SprinBoot operates, Along with how Validation groups, Roles, REST API's, Controllers and MySQL work. During my time at Informiz.org, I have written hundreds of tests and have shipped many features
and bug-fixes to production.
I Self-taught with mentorship — quickly adapted to new technologies and contributed to production-grade code.

### TV Director

2003 - 2023   Freelance

Highly technical position, in major TV studios.
Live coverage of developing news and sports,
e.g CHAMPIONS LEAGUE matches.
With 20 years of live broadcast experience into the tech world —
fast-thinking, cool under pressure, and deeply collaborative
